Good morning,

I am interested in working for Pflugerville ISD in the position of either IT technical support as it related to my current major, I am working towards in my master's degree or a substitute teacher as I do have experience performing the duties and currently work with kokua education. I believe both positions provide me with the opportunity to build my work experience and develop my skills as a person.

I see both of these two jobs as a step towards a career of full time employment and hope to leverage the skills I gain in future endeavors.

Respectfully,

Geralt Heart
