Good morning,

I am interested in working for your institution as I work towards my master's degree. I have direct experience working with children K-12/undergrad in my previous jobs at South Texas College and Harmony Science Academy. I also went through an early college program myself and I am familiar with the concerns and planning students will be going through. I am comfortable speaking with parents and have familiarity with students' nervousness and anxiety related to working towards future goals.

Respectfully,

Geralt Heart
